

Solvent

Low Odour

Description

Nemco Solvent is considered low-odour and is used for industrial and commercial applications for removing oil and grease, thinning oil-based paints, varnishes, or polyurethanes, and can also be used as a fuel burning agent.

Nemco Solvent is generally used in the vehicle repair and maintenance industry as a parts cleaning solvent. Keeping covers closed on parts cleaning equipment reduces evaporation and promotes a safer working environment. Removing heavy deposits with a scraper or wire brush before washing parts with solvent will help to extend the solvent's useful life.

Use and Storage

Always read and follow your equipment manual. Solvent has a shelf life of 5 years under ideal storage conditions. Keep packages closed while not in use, store in a cool, dry area and away from open heat sources, sparking tools and equipment.

Health, Safety, & Environment

GHS compliant Safety Data Sheets are available at nemco.ca under the Safety Data Sheets. For SDS in French, please contact info@nemco.ca. This material is WHMIS 2015 and TDG classified. The SDS contains valuable information critical to the safe handling and proper use of the product. Always take used chemicals to an authorized collection point. Avoid discharge into drains, soil, or water. As with any chemical, keep out of reach of children and animals.

Quality

Nemco works with respected industry suppliers. Nemco Resources Limited manufacturing facility in Winnipeg, Manitoba is proud to be certified to ISO9001. For questions regarding quality, please contact your local sales representative.

Typical Characteristics - Nemco Solvent

Properties	Method	Typical	Properties	Method	Typical
Colour	Appearance	Colourless	Freeze point, °C(°F)	ASTM D3321	-76(-105)
SPG, 20°C	Internal	0.788	Flash point, °C(°F)	ASTM D93	43(109)

These characteristics are typical of current production, variations in these characteristics may occur.
